Exposure to	C#	Java	StyleX

WORK EXPERIENCE

Full Stack Web Freelancer   **Jan 2024 - Present**

- Assisted small businesses in enhancing their online presence through the development of customized websites.
- Implemented additional functionalities such as Appointment Booking and authentication to optimize user experience.
- Leveraged full stack development skills to deliver comprehensive solutions tailored to client needs.

PROJECT EXPERIENCE

UberEats-Clone   LIVE   CODE

- Designed and implemented a front-end with integrated back-end functionality, resembling an UberEats clone. This project was undertaken to acquire practical skills and mastery in TypeScript, React, Firebase, Redux, React Router, and Tailwind CSS.
- Implemented **restaurant listings with menus** for multiple stores and designed **order processing functionalities** for users, including order history.
- Successfully replicated core UberEats platform functionalities while utilizing Tailwind CSS for responsive and visually appealing UI components.

UI/UX Designer - GiftWrapp   **Jan 2023 - April 2023**   VIEW

- Developed a low to medium fidelity prototype from scratch, incorporating personas, user stories, and scenarios with a team.
- Idea originated from a brainstorming session for a gift wrapper application
- Executed processes including paper prototype, low fidelity prototype, usability inspection, heuristics, and usability tests
- Resulted in an intuitive design reflecting user mental models
